

Welcome

The AJS(ACT) is pleased to be hosting the 5th biennial NFAJS conference.

The 2010 conference is a great opportunity to learn of exciting new networks that are emerging between Australia and Japan and of the web-based tools that are making communication across borders easier than ever before.

Presentations will specifically deal with using the internet and websites to maintain relationships with other organisations. New professional, cultural and artistic networks will be presented along with the way in which they have been developed and maintained. Everyone involved in Australia-Japan networking will gain from this focus.

This will also be an opportunity for Japan-Australia Societies to visit Australia and meet and network with their AJS counterparts.

The conference will be held in the beautiful surrounds of University House at the Australian National University.

So come and join us. You'll be made very welcome and will have a fruitful and memorable time.

Stuart Forsyth
President
